

Our Digits

Meet through the glass

A way to feel someone's presence when distance keeps you apart.

Our Digits is a touch-based web app for two people. It lets you connect live in real time or create DigiGrams when you cannot be together.

No account, password, or phone number is required.

Our Digits feels most powerful when touch, visuals, and conversation happen together. For the richest live experience, it is recommended that you and your partner stay on a phone call while using the app.

What Our Digits Is

Our Digits is more than a chat or shared link. It creates a sense of presence between two people through the device itself.

The experience combines:

- touch
- visual response
- motion
- sound
- live interaction or saved keepsakes

Together, these elements help two people truly meet through the glass.

The Two Ways to Use Our Digits

You can use Our Digits in two ways.

Live

Connect with another person in real time using one-time Digits.

DigiGrams

Create a touch experience someone can open later and keep on their device.

Quick Start

1. Open ourdigits.com.
 2. Tap Share Live to send a direct join link to your partner, or manually share your one-time Digits.
 3. Your partner taps the link and presses the glowing Enter button.
 4. Stay on a phone call together for the richest live experience.
 5. If you are not meeting live, create a DigiGram instead.
 6. To start over at any time, tap the Our Digits logo to recycle the Digits and clear the session.
-

Install on Your Device

Our Digits works directly in a browser, but installing it can make the experience feel more like a native app.

On Android

1. Open ourdigits.com.
2. Tap the browser menu in the top-right corner.
3. Select Add to Home screen or Install app.
4. Confirm the install.

Some Android devices may show an install prompt automatically.

On iPhone or iPad

Using Safari:

1. Open ourdigits.com.
2. Tap the Share button.
3. Scroll down and tap Add to Home Screen.
4. If shown, enable Open as Web App.
5. Tap Add.

Why Install It

Installing Our Digits can make it:

- easier to open from your home screen
 - more immersive and app-like
 - faster to return to for repeat sessions
 - less likely to trigger browser menus accidentally
-

Share Live

Share Live lets you skip manually entering Digits.

When you tap Share Live:

- Our Digits creates a direct join link
- you send that link to your partner
- they tap the link
- they press the glowing Enter button to join

After sharing, return to Our Digits to complete the live session.

You may see this reminder message:

After sharing, tap back here to connect.

You may need to tap back twice depending on the app you shared from.

Some devices may also send a reminder notification to return to the app.

DigiGrams

DigiGrams allow you to create a touch experience someone can open and keep later.

They are more than delayed messages. They are replayable keepsakes.

Available types include:

- DigiGram – A multi-touch finger and thumb imprint experience.
- KissGram – Lips and nose imprints.
- TraceGram – Draw using colored traces and adjustable trace length.
- TapGram – Play sounds when tapping. (*Sound may not be audible during phone*)

calls.)

- **TinyGram – Capture and share infant or child prints.**
-

When Someone Receives a DigiGram

1. They open the link.
 2. They are taken to the correct place automatically.
 3. They see a glowing DigiGrams button.
 4. They tap it to open the shared DigiGram.
 5. They can save it to their device to keep and revisit later.
-

Creating DigiGrams

Inside the DigiGrams experience you can personalize what you send.

You can:

- **choose the DigiGram type**
- **adjust imprint settings such as softness, pressure, and size**
- **change the mood using Vibes**
- **select your avatar**
- **record and replay touch patterns**
- **share the finished result**

This makes each DigiGram expressive and personal.

Top Controls

The main controls shape the experience.

Create

Open the creation area to start a new DigiGram or choose a type such as DigiGram, KissGram, TraceGram, TapGram, or TinyGram.

Reflect

Open your saved grams so you can revisit, replay, and continue meaningful touch experiences.

Imprint

Adjust the imprint settings.

Depending on the mode, the icon changes:

- **fingerprint for touch imprints**
- **lips for KissGram settings**

Settings include:

- **softness**
 - **pressure**
 - **size**
-

Vibe

Change the look and atmosphere of the experience through themes and color moods.

Avatars

Our Digits uses avatars instead of uploaded photos.

How they work:

- **your avatar appears in the bottom-right corner**
- **tap it to choose or change your avatar**
- **your partner's avatar appears in the top-left corner**
- **if your partner has not chosen one yet, a boat appears as the default placeholder**

This keeps the experience personal while avoiding unsafe photo sharing.

Main Features

Live Connection

Connect with another person in real time and interact on the shared touch surface.

Interact

Open the Interaction area to use the:

- **DigiPad**
- **KissPad**
- **TracePad**
- **TapPad**
- **TinyPad**

The Pads are the live versions of the Gram experiences.

Hold Hands

A mode designed for meaningful moments when you cannot be physically together.

Hold your phone horizontally at your side with your fingers touching the screen while your partner does the same.

Record and Playback

Where available, you can:

- **record touch patterns**
 - **play them back**
 - **pause**
 - **stop**
 - **repeat**
-

Sharing

Use link sharing within the app for both live sessions and DigiGrams so the other person can enter the correct experience instantly.

Starting a New Session

The Our Digits logo on the home screen also acts as a reset.

When tapped:

- **current Digits are recycled**
- **the session is cleared**
- **a fresh session begins**

A faint recycle symbol on the logo hints at this behavior.

Helpful Tips

- **For the richest experience, use Our Digits while on a phone call.**
 - **Use Share Live to skip typing Digits.**
 - **After sharing a live link, return to the app to complete the connection.**
 - **If you are not available at the same time, create a DigiGram instead.**
 - **Ask the recipient to save a DigiGram if they want to keep it. The app will prompt them.**
 - **Explore Imprint settings to adjust softness, pressure, and size.**
 - **Try different Vibes to match the moment.**
 - **Tap the Our Digits logo for a clean start.**
 - **iPhone and iPad users should install using Safari.**
-

Accessibility and Device Notes

On iPhone and iPad, haptic feedback is not currently supported in the same way.

The visual experience still works and remains immersive and expressive.

Install behavior may vary by browser and device. If you do not see the expected install option, use the recommended browser for your platform.

FAQ

Do I need to download an app from an app store?

No. Our Digits is a web app. You open it in your browser and can optionally install it to your home screen.

What does “install” mean?

It adds Our Digits to your device so it opens more like an app.

Do we have to type the Digits manually?

No. Share Live sends a direct link so the other person can join instantly.

What happens after I send a live invite?

Return to Our Digits so the session can complete the join.

What are DigiGrams?

DigiGrams are saved touch experiences that can be opened later and kept on the recipient's device.

Can I customize a DigiGram?

Yes. You can choose gram types, adjust imprint settings, switch Vibes, change avatars, and record playback patterns.

What happens when I tap the Our Digits logo?

It resets the session, clears the current state, and recycles the Digits.

Why don't I see "Add to Home Screen"?

The wording varies by device and browser. On Android it may appear as Install app or Add to Home screen. On iPhone and iPad, use Safari and the Share menu.

Do haptics work on iPhone or iPad?

Not currently. The visual experience still works and remains immersive.

Do both people need the same phone?

No, although install behavior and browser features may vary slightly.

Does it work without an account?

Yes. Our Digits is designed so people can connect without creating an account or entering a phone number.

Why use avatars instead of photos?

Avatars help keep the experience safer and focused on connection while avoiding inappropriate image sharing.

Troubleshooting

If something is not working as expected:

- **refresh the page**
- **tap the Our Digits logo to start a fresh session**
- **confirm both people are using the current Digits**
- **after using Share Live, return to Our Digits**
- **use Safari on iPhone/iPad for install**
- **check the browser menu on Android devices**
